

PATRICIO TURPIN
FULL-STACK SOFTWARE ENGINEER

patricioturpin@gmail.com | +54 379 427 4996 | Corrientes, Argentina
patricioturpin.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4 years of experience building and operating production SaaS products with React, Next.js, TypeScript, Node.js, and PostgreSQL. Experienced in owning features end to end - from ambiguous product requirements and architecture decisions to API integration, deployment, observability, and production support. Co-founder of a multi-tenant scheduling platform, with a product-focused approach to reliability, maintainability, and customer outcomes.

CORE SKILLS

Full Stack: TypeScript, JavaScript, Node.js, React, Next.js, REST APIs

Data & Platform: PostgreSQL, Prisma, Supabase, authentication, payment and third-party integrations

Engineering: Git, Vercel, Sentry, CI/CD workflows, production debugging, frontend architecture, Tailwind CSS

EXPERIENCE

Semi-Senior Frontend Engineer | [Auravant](#)

Aug 2022 – Present

Remote / Argentina

- Build and maintain production product features for a B2B agritech platform using React, Next.js, TypeScript, and API-driven workflows.
- Own features from requirement clarification and technical design through implementation, API integration, testing, release, and production support.
- Investigate and resolve high-priority production issues across frontend state, asynchronous data flows, API behavior, browser compatibility, and backend dependencies.
- Partner with product, design, and backend engineers to break down ambiguous operational problems and ship maintainable improvements iteratively.

Co-Founder & Full-Stack Developer | [Agendito](#)

Sep 2023 – Present

Argentina | agendito.com

- Designed, built, and operate a multi-tenant scheduling SaaS using Next.js, React, TypeScript, Node.js, Prisma, PostgreSQL, and REST integrations.
- Own the product end to end across frontend, backend, data modeling, and infrastructure, including scheduling logic, authentication, payments, subscriptions, customer workflows, and calendar integrations.
- Turn incomplete requirements and direct customer feedback into scoped releases, architecture decisions, and product improvements focused on reliability and business outcomes.
- Manage deployments, database operations, observability, incidents, and third-party integration failures across Vercel, Supabase, PostgreSQL, and Sentry.

Frontend Developer | [CentralTicket](#)

Aug 2022 – Apr 2023

Argentina

- Contributed to a production ticketing platform and its migration from Vue.js to SvelteKit, TypeScript, and Tailwind CSS.
- Improved application stability during the migration, reviewed code, and supported junior developers through onboarding and technical guidance.
